

Simple Art Program

The project uses a combination of for loops, if statements, functions, and variables to accomplish a simple drawing application. GUI elements from the [p5.touchgui](#) project are utilized for a smoother experience.

Three sliders individually control the color of the brush, one adjusts the red value, one green, and one blue for complete freedom in choices. A button is used to reset the canvas, and is titled as such. Finally, a toggle button is present to allow for the option to stop drawing.

Features

- 1) The ability to draw with the mouse
- 2) The ability to reset the canvas
- 3) The ability to change the red value
- 4) The ability to change the green value
- 5) The ability to change the blue value
- 6) The ability to stop executing the drawing code
